

# SPOTTERS

## NO GO ZONE SPOTTER

### COURSE CONTENT

This module provides initial training in accordance with the requirements of Energy Safe Victoria. It is personnel required to be authorised as No Go Zone Spotter, worksite safety observers. This course is designed to develop competency in the tasks of observing and warning personnel operating mobile plant and equipment against unsafe approach to overhead and underground powerlines and other electrical equipment.

### TOPICS INCLUDE:

- Requirements of and responsibilities under the Occupational Health & Safety Act of 2004
- Workplace incidents and injuries
- Applicable Compliance Codes, Regulations and Standards
- Duties, functions, Roles and Responsibilities of the No Go Spotter
- Electrical Conductor and equipment Identification
- No Go Zone approach limit distances to electrical conductors and equipment
- Requirements for work within No Go Zone
- Job Safety Analysis and Risk Assessments
- Communication Signalling Methods

### OUTCOME OF COURSE:

On completion the learner should be able to:

- Explain the duties, responsibilities and Roles of a No Go Zone Spotter where mobile equipment and plant is used near electrical conductors.
- Identify electrical equipment, No Go Zone approach limit distances and procedures in the event of contact by equipment and plant with electrical conductors.
- Described approved communication signalling methods used by the No Go Zone Spotter including prestart considerations and job safety assessment prior to work near electrical equipment and conductors.
- Identify operating characteristics and factors including site hazards affecting mobile equipment and plant

### PREREQUISTES

The learner must possess:

- A current Certificate of competency in operation of the plant they are spotting for;
- Approved, appropriate and current First Aid Certificate.
